21st Century Automotive Career Training LLC is working in conjunction with The Ding King and Ohio Curriculum Specialists to develop one year learning pathways for high school junior and seniors mapped to Ohio State standards. The courses are also applicable for adults and youthful offenders. The Blended Learning Courses include teacher training, an online portal, instructor guides, and student materials that are combined with hands on training to fully prepare students for the workforce. Graduates will receive certification and be ready for internships, and upon graduation full time positions. The first three courses will be Paintless Dent Repair 80, Glue pulling, and Hail Repair. Graduates will be eligible for jobs paying \$30k to \$120K per year, or to have their own businesses. The company is also designing, building out, and outfitting 21st Century Automotive Labs for Schools and Youth Services.
